

Notification of Curriculum Update for Program of Biomedical Engineering (2017 UG International Students)

To help the students adapt to the professional learning smoothly after selecting major, we have updated our current curriculum.

1. The course category of “Animal Physiology”(BIO311-14) has been changed from Major Foundational Course to Major Elective Course.
2. As a result, the credits requirement of the Major Core Courses has been changed to 18 credits; the minimum credits requirement for graduation (not including English courses) has been changed to 137.5 credits.
